SUMMARY

Detail-oriented business analyst with experience in project management, data analysis, process improvement, and requirement gathering. Skilled in translating stakeholder needs into actionable specifications, supporting cross-functional teams, and driving operational efficiency through analytical insights. Eager to leverage business expertise in data-driven decision-making, reporting, and process optimization to support client objectives and project success.

WORK EXPERIENCE

Business Analyst, Arikkan Inc.

June 2024 - Present

- Manage end-to-end implementation of statewide Election Management Platforms in an Agile software development lifecycle, managing iterative delivery from requirements definition through testing, deployment, and handover to ensure reliable, on-schedule system launches.
- Lead requirement-gathering meetings, translating complex needs into clear, actionable specifications for development teams.
- Support quality assurance testing by validating deliverables against requirements, contributing to reliable software deployments.
- Review and validate project data tables to uphold accuracy.
- Query data for report generation as requested by stakeholders.

Full-Stack Web Development, Career Foundry

July 2023 - April 2024

- Developed full-stack web applications including custom API's for seamless data integration between front-end and back-end systems.
- Built API's using RESTful architecture paired with JSON data formatting, endpoints thoroughly tested using Postman.
- Implemented robust testing framework using Jest, Cucumber, and Puppeteer to ensure code quality and maintainability.
- Integrated serverless functions using AWS Lambda to implement authentication methods for 'Open Authorization' (OAuth).
